

Trustseal Ltd Environmental Policy

Established in 1995, Trustseal Ltd. initially emerged as a prominent manufacturer and installer specialising in high-friction surfacing. Over the years, our steadfast commitment to excellence has propelled us to the forefront of independent road surfacing providers nationwide. With a comprehensive scope, Trustseal Ltd. seamlessly executes High Friction Surfacing projects on a national scale, contributing to the enhancement of motorways and highways across the UK. Collaborating closely with councils nationwide, Trustseal Ltd. has garnered an outstanding reputation for delivering exceptional results.

Distinguished by our prowess, Trustseal Ltd. not only excels in High Friction Surfacing but also possesses the expertise to undertake road marking contracts. Our track record includes securing various maintenance contracts, such as those in Nottingham and Leeds, showcasing our operational and technical prowess consistently.

At Trustseal Ltd., our commitment to quality is unwavering. Our high-quality products are meticulously crafted and certified to HAPAS standards. Our installation team members are equipped with skilled worker CSCS cards and relevant NVQ certifications, ensuring a workforce of utmost proficiency. Supervisors undergo SSSTS and Lantra training, further enhancing our operational excellence.

Within Trustseal Ltd.'s maintenance and fabrication department, we proudly manufacture, service, and maintain a fleet of 15 purpose-built High Friction Surfacing and Road Marking Vehicles. These vehicles, operating nationwide.

Trustseal hold ISO9001:2015 Sector Scheme 7 certification, attesting to our commitment to quality management.

Trustseal Ltd. holds certificates for Constructionline, Chas, Avetta and FORS, and are working toward ISO 14001 We also proudly aligns ourselves with the South Yorkshire Training Group. Our commitment extends beyond project execution to compliance with all regulations and standards governing the highways industry, with our ISO 9001:2015 Quality Management System, and all pertinent environmental legislation. Trustseal Ltd. stands as a beacon of excellence, ensuring the seamless integration of quality, safety, and environmental responsibility in every facet of our operations.

- Trustseal Ltd (Offices & Workshop) - 10 Southfield Lane, Whitwell, Worksop S80 3LH.

To maintain compliance with environmental legislation, the organisation has established and implemented an Environmental Management System (EMS). The intended outcomes of the environmental management system are:

- Enhancement of environmental performance.
- Fulfilment of compliance obligations.
- Achievement of environmental objectives.
- Remain competitive in the industry, and
- Ensure that tenders and contracts are not jeopardised.

Trustseal Ltd. is committed to its environmental performance, protecting the environment, and preventing pollution because of the organisation's activities, products, and services. These commitments will be followed regarding:

- Storage of hazardous substances.
- Storage and disposal of hazardous waste.
- Training for all individuals controlled by or under the control of Trustseal Ltd.
- Purchasing and procurement; and
- Design, manufacture, repair, and development of new products and/or services.

All employees are responsible for complying with the requirements of the EMS, including identifying hazards, reporting issues, errors, or incidents during the operation of manufacturing, and applying road surface coverings, and cooperating with auditors. Trustseal is well-positioned to continue to improve and grow to explore new ventures and opportunities.
