

Trustseal Ltd Environmental Policy

Founded in 1995 as a manufacturer and installer of high friction surfacing Trustseal Ltd has rapidly grown to become one of the main independent road surfacing providers in the country. Trustseal Ltd carries out High Friction Surfacing nationwide including work on the motorways and highways across England and Wales. Trustseal Ltd also works closely with councils in the London area as well as more local work in Nottingham & Sheffield and has acquired an excellent reputation nationwide.

Trustseal Ltd has the capability to undertake road marking contracts and has been successful in winning several maintenance contracts including Nottingham & Leeds and has demonstrated operational and technical expertise on multiple occasions.

Trustseal manufactures its high-quality products that are certified to HAPAS/BBA standards. All members of Trustseal Ltd installation team hold a skilled worker CSCS card and an NVQ in High Friction Surfacing. All supervisors, within this team, have completed SSSTS & Lantra training.

Trustseal Ltd.'s maintenance and fabrication department manufacture, services and maintains 15 purpose-built High Friction Surfacing and Road Marking Vehicles which operate throughout the country and are ISO9001:2015 Sector Scheme 7 certified. Trustseal Ltd hold certificates for Constructionline, Chas, Avetta, Exor and FORS and are members of South Yorkshire Training Group.

Trustseal Ltd is committed to maintaining compliance with all regulations and standards governing the highways industry, the organisation's ISO 9001:2015 Quality Management System, and all environmental legislation that regulates the operations at:

- Trustseal Ltd (Offices & Workshop) - 10 Southfield Lane, Whitwell, Worksop S80 3LH.

To maintain compliance with environmental legislation, the organisation has established and implemented an Environmental Management System (EMS). The intended outcomes of the environmental management system are:

- Enhancement of environmental performance.
- Fulfilment of compliance obligations.
- Achievement of environmental objectives.
- Remain competitive in the industry; and
- Ensure that tenders/contracts are not jeopardised.

Trustseal Ltd is committed to its environmental performance, protecting the environment, and preventing pollution as a result of the organisation's activities, products and services. These commitments will be followed with particular regard to:

- Storage of hazardous substances.
- Storage and disposal of hazardous waste.
- Training for all individuals controlled by or under the control of Trustseal Ltd.
- Purchasing and procurement; and
- Design, manufacture, repair, and development of new products and/or services.

All employees are responsible for complying with the requirements of the EMS, including identifying hazards, reporting issues/errors or incidents during the operation of manufacturing and applying road surface coverings, and co-operating with auditors. Trustseal is well-positioned to continue to improve and grow to explore new ventures and opportunities.
