

Environmental Policy Statement

Trustseal believe that the effective management of environmental issues is essential to the ongoing success of the business. We accept that our activities may impact on the environment and acknowledge our responsibilities in this area. The Company is committed to compliance with all relevant legislation and associated guidance and will strive to reduce pollution to its lowest practicable level.

The Company accepts its responsibility to minimise its impact on the local environment and will promote a positive influence by co-operating with our neighbours to ensure the proper maintenance of sites, roadways, and buildings.

Our objective is to cause as little harm to the environment as possible. This will be achieved by adopting the following principles.

- Regular monitoring and review of potential impacts on the environment will provide the foundation for continuous improvement of the Company's environmental performance.
- The establishment of a waste management programme, adopting the hierarchy of reduction, re-use, recovery (including recycling), and finally disposal.
- Promotion of the efficient use of energy by its employees.
- When planning work, our employees will aim to keep any potential impact on the environment such as noise, dust, smells, or fumes to a minimum.
- All waste will be disposed of responsibly; employees will comply with agreed waste disposal requirements relating to any areas under our control.

- **Environmental Management**

To ensure the Company's objectives are met, systems will be used to monitor and manage environmental performance in our operations. The key to this will be environmental aspects and impacts. In compliance with environmental legislation and recognised good practice for our industry sector, and in consultation with our employees and relevant parties who may have a legitimate interest in our activities.

Operating procedures and controls will be developed to reduce any risk to the environment to the "lowest level practicable". Reviews of our environmental performance will be included in regular inspections and audits.

- **Energy**

Continuous improvement in the efficient use of energy is vital for the continuing prosperity of the company, for reducing global pollution and to conserve energy sources. Focussed objectives will be developed for the management of energy use, will be encouraged with objectives, improved housekeeping, control of processes and the efficient use of resources.

- **Waste reduction**

All waste represents an inefficient use of resources and energy. We shall aim to reduce the quantity of waste generated by our plant, work equipment, land management and work practices by a continuous programme of waste that will be regularly reviewed to evaluate routes whereby waste can be eliminated, reduced or recycled.

- **Training**

The Company believes that awareness and knowledge of environmental issues is an important part of the process of effective environmental management. Therefore, it will be an objective to provide suitable information and training to our employees to ensure they are able to make informed decisions and take appropriate decisions in their work activities.

- **Suppliers & Sub-contractors**

The Company checks its suppliers and sub-contractors environmental commitment by asking for a copy of their environment policy when we send out our questionnaire.
